

The Right Connection™

New Dixon Bayco 5000AI API Interlock Valve

New Features with Longer Service Life

- A** Dixon Bayco is pleased to introduce our new Bayloy alloy, 5000AI air interlock valve. Bayloy has superior resistance to corrosion and eliminates the corrosion problems with Bronze and Aluminum assemblies. This proprietary alloy also provides similar wear resistance to Bronze at less weight.
- B** Stainless Steel button resists corrosion.
- C** New Stainless Steel shaft provides greater strength and Corrosion resistance than the current Bronze shaft.
- D** Counter bored inlet and outlet ports to improve O-ring seal life.
- E** Stainless Steel mounting hardware prevents corrosion of fasteners.

The new Dixon Bayco 5000AI series Interlock Valve will be available in the Dixon Distribution System in the next 2 months.
