

The Right Connection™

Tanker & Overfill Prevention

Tanker Equipment Range

Dixon Bayco manufactures a full range of sensors, monitors and sockets for compatible with other leading brands systems.

The Bayco product range consists of Petroleum and Dry Bulk tanker fittings including adaptors, valves, API's and Nozzles.

Overfill Prevention System

FloTech branded overfill prevention equipment is compatible with the base of gantry rack monitors installed throughout the UK and Ireland. The equipment has the necessary ATEX approvals and is accepted by the UK Safe Loading Pass Scheme.

Tanker manufacturers throughout the show will be displaying FloTech equipment on their vehicles

New Plug & Play System

The Plug & Play wiring system has been developed to significantly reduce the installation time of the tanker mounted probes and sockets.

The FloTech Plug & Play system provides a pre-made wiring harness that simply connects to each of the probes and sockets by way of suitable environmentally protected connectors. With this system, there is no need to strip wires and make crimp connections. This will not only provide a faster installation but, as all the connections are pre made, will also eliminate connection errors by the installer.

5300 API Loading Arm Coupler

The Dixon stand will also feature Dixon Bayco's 5300 Loading Arm Coupler. The unit is completely modular so the coupler can be built with various face seal combinations to be compatible with alternative fuel / performance levels and applications. Two models are available: bonded nose seal and replaceable nose seal.

The 5300 Coupler has a maximum working pressure of 150 PSI, a peak surge pressure of 350 PSI and an operating temperature: -28°C to 204°C (Viton-B® seals)

Composite Hose

Dixon also offers a range of anti static suction and discharge composite hose assemblies designed for use on plant or road/rail tankers. The hose construction is exceptionally flexible for ease of handling yet remains robust, hard wearing and cost effective.

Tanker & Overfill Prevention Catalogue

The Tanker and Overfill Prevention Products catalogue showcases the full range of Bayco petroleum products and Flotech Equipment as well as the Dixon range of dry bulk tanker products.
