

The Right Connection™

New Ball Valve Nozzle

Features:

1. New Compact Profile
2. New hose swivel design provides easy movement and leak free operation
3. New swivel seals are easy to replace and swivel can be rebuilt while still attached to the hose
4. Swivel design allows for easy re-greasing without teardown

For further information on the brake interlock or our range of tanker fittings and overfill prevention system, please contact our sales department on 01772 323529
